Washington, DC | 202-271-5141 | jerogan@umich.edu | [LinkedIn](#)

EDUCATION

University of Michigan, College of Literature Science and Arts

Ann Arbor, MI

Bachelor of Science in Computer Science

May 2026

GPA: 3.54 / 4.00

Relevant Coursework: Data Structures and Algorithms, Computer Organization, Data-Driven Web Applications, Web Systems, Computer Security, Operating Systems, Game Development, & Software Engineering

SKILLS

Programming: Python, C/C++, Java, C#, HTML, CSS, JavaScript, Node.js, React

Developer Tools: Git, VS Code, Unity, Linux, Windows, MacOS, Docker, AWS, MySQL, NoSQL, MongoDB

WORK EXPERIENCE

Concurrent LLC

Boston, MA

Quantitative Analyst Intern

May 2023 – August 2023

- Scraped and processed battery storage data using BeautifulSoup, automating data extraction and cleaning. Developed scripts to efficiently store semi-structured data in a MongoDB database.
- Leveraged NoSQL queries to retrieve and analyze battery storage data, generating insights for investor reports. Created dynamic visualizations using Matplotlib to highlight key trends and performance metrics.

Wolverine Media Group

Ann Arbor, MI

Strategy Manager

Jan 2024 – Present

- Leading a team of 6 staffers, overseeing individual projects, fostering leadership growth, and managing internal records for clients and daily operations.

Strategy Staffer

Sep 2023 – Dec 2023

- Optimized Ad data retrieval and analysis with Google's API, improving processing efficiency. Created Matplotlib data visualizations to highlight trends and inform decisions.

Office of the Attorney General for the District of Columbia

Washington, DC

Civil Rights Division Intern

June 2022 – July 2022

- Contributed to high-profile civil rights cases in the District of Columbia by collaborating with experienced lawyers to develop case strategies, timelines, and legal groundwork.
- Applied analytical problem-solving and technical research skills to organize information pertaining to congressional hearings for clarity and accessibility.

PROJECTS

NASA Collaborative Laboratory for Advanced Work in Space | C#, Python, Unity

Feature Team Lead

Sep 2024 – May 2025

- Leading development of key AR software features, including task list and geo-sampling tools. Managing a team of 4-5 developers, providing Unity and C# training to ensure timely feature delivery.

Augmented Reality Software Engineer

Sep 2023 – Present

- Developing key AR software components for NASA astronauts using C# in Unity.

Control Hijacking | Ghidra, Python, C, x86_64 Assembly (Intel)

Oct 2024

- Successfully exploited 8 targets by performing buffer overflow attacks using advanced techniques, including return-to-libc, return-oriented programming (ROP), buffer over-reading, and reverse-engineering vulnerabilities.
- Utilized Ghidra for decompilation and function analysis, identifying vulnerabilities and using the GDB debugger to disassemble functions, trace stack/memory addresses to inject shellcode effectively.

[Call Quality Dashboard](#) | Python (Flask), Grafana, Prometheus, Docker AWS (EC2)

Nov 2025

- Built a real-time Genesys Cloud call quality monitoring (MOS, Jitter) using a Flask exporter and Prometheus to drive Grafana dashboards, implementing mock data generation for robust testing.
- Deployed to AWS EC2 via Docker Compose using GitHub Actions and Octopus Deploy; utilized post-deployment scripts within the CI/CD pipeline to automate Grafana alert rule provisioning.
